LIST OF TABLES

Table 1. Average monthly discharge for the months August and January for bull trout basins in the Willamette Recovery Unit.	5
Table 2. Releases of adult spring chinook salmon from the McKenzie and Willamette Hatcheries, 1993 to 1999 (ODFW data).	7
Table 3. Number of bull trout fry and juveniles captured in the downstream migrant trap in Anderson Creek, 1994 through 2001 (Ziller and Taylor 2000; D. Bickford, U. S. Forest Service, pers. comm., 2001a).	15

Table 4. Bull trout fry transferred from Anderson Creek, a McKenzie River tributary, to the Middle Fork Willamette River basin above Hills Creek Reservoir. Adapted from Taylor and Reasoner (2000).	19
Table 5. Changes in Oregon Department of Fish and Wildlife angling regulations to protect bull trout (Ziller and Taylor 2000).	39
Table 6. Changes in management of hatchery-reared rainbow trout implemented by the Oregon Department of Fish and Wildlife to reduce take of bull trout in the upper Willamette River basin (Ziller and Taylor 1999).	40

LIST OF FIGURES

Figure 1. Bull trout recovery units in the United States. The Willamette River Recovery Unit is highlighted.	2
Figure 2. Map of the Upper Willamette River core area, with local populations delineated.	10
Figure 3. Number of bull trout counted at Leaburg Dam on the McKenzie River, 1995 through September 2001 (partial count).	12
Figure 4. Redd counts in Anderson Creek, a tributary to the McKenzie River, 1989 through 2001.	14
Figure 5. Redd counts in Olallie Creek, a tributary to the McKenzie River, 1995 through 2001.	14
Figure 6. Redd counts in the Roaring River, a tributary to the South Fork McKenzie River, 1993 through 2001.	18
Figure 7. Location of core habitat in the Clackamas River basin and of potential core habitat in the Santiam River basin.	21
